DETAILED ACTION

Claim Objections

Claim 23 objected to because of the following informalities: In line 2 of claim 23, "tubing tubing" is an error. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 23 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In line 3 of claim 23, "cylinder" lacks proper antecedent basis.

In claim 23 it is unclear how the films are secured to the cylinder 430. In claim 23 it is unclear how the cylinder 430 forms an orifice. Because of these instances of indefiniteness claim 23 is not understood.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 23 is **as best understood** are rejected under 35 U.S.C. 103(a) as being unpatentable over Christine et al in view of Steer et al.

Christine et al show a fluid dispenser comprising a deformable tubing 28 having two edges 40 attached to a film 20. Christine et al lack showing if the film is two pieces. Steer et al show a cylinder attached to two sealing films 60, 66 (figure 15), as an alternative equivalent means for manufacturing a container. It would have been obvious to one of ordinary skill in the art to have modified the Christine et al dispenser with the tubing attached to two films as taught by Steer et al as alternative equivalent means for manufacturing a container.

Allowable Subject Matter

Claims 1-10, 13 and 16-22 are allowed.

Response to Arguments

Applicant's arguments filed 1/27/06 have been fully considered but they are not persuasive. Re claim 23 the arguments applicant makes are moot because it is unclear exactly what is claimed due to the claim being indefinite.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

Art Unit: 3754

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
